

eTRAP [electronic Text Reuse Acquisition Project]

A research group implementing the A.C.I.D. eHumanities paradigm

EMILY FRANZINI, HUMANIST

BIBLIA
τὰ βιβλία τὰ ἄγία
THE BIBLE
LA BIBBIA
DIE BIBEL

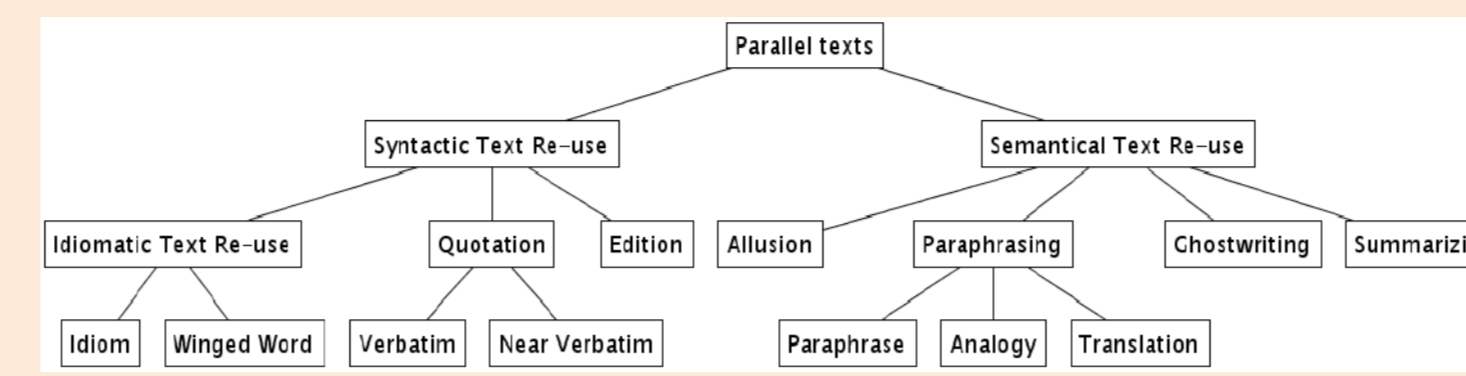

Research Questions

The re-use of text across languages is a gold mine for **transcultural** studies. When observing translated text,...

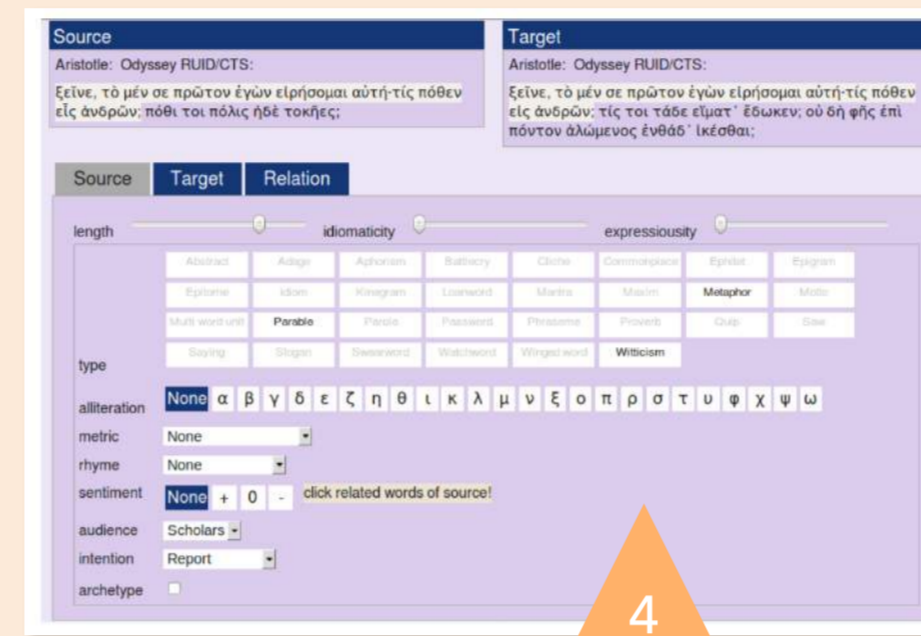

- ▶ ...what is the scale of divergence from one text to the other?
- ▶ ...what is the divergence caused by? Translator competence or linguistic, cultural, ideological and political norms?
- ▶ Could machine translators be used to rid a translation of any external contextual influences?

D(iversity)

The many styles of text re-use.

Proposed methodology: Text re-use browser prototype.

MARCO BÜCHLER, COMP. SCIENTIST

Research Questions

- ▶ Which are the determinable **minutiae** of text re-use and which of them can be calculated by machines?
- ▶ What can't, by contrast, be calculated?
- ▶ How can text re-use analysis be improved by the calculation of paradigmatic relations?

I(nteroperability)

Annotation; storage; encoding standards. How to **homogenise** datasets in order to ensure interoperability and **minimise** data preparation/conversion?

The example below shows three ways of annotating text re-use.

Cit-quote-bibl	blockquote	bibl without quote
<pre><dt> <quote>du/o ku/nas a]rgol\ ei (/ponto/</quote> <bibl n="Hom. Od. 2.11">Od. 2.11</bibl> </dt></pre>	<pre><quote rend="blockquote"> - <line> a]gxou= d' i(stame/nh e)/pea ptero/zante proschu/da <bibl n="Hom. Il. 4.92">Il. 4.92</bibl> </line> - <line> a)]' a]/ge nu=n ma/stiga kai\ h (ni/a sigalo/enta <bibl n="Hom. Il. 5.226">Il. 5.226</bibl> </line> </quote></pre>	<pre><p> [...ja]nti\ tou= proe/pinon. kuri/ws ga/r]sti tou=to propi/nein, to\ e (te/rw] pro\ e(autou= dou=nai piei=n. kai\ o(*jodusseu\s de\ para\ tw=] * (omh/rw] <bibl n="Hom. Od. 13.57">Od. 13.57</bibl> [...]</pre>

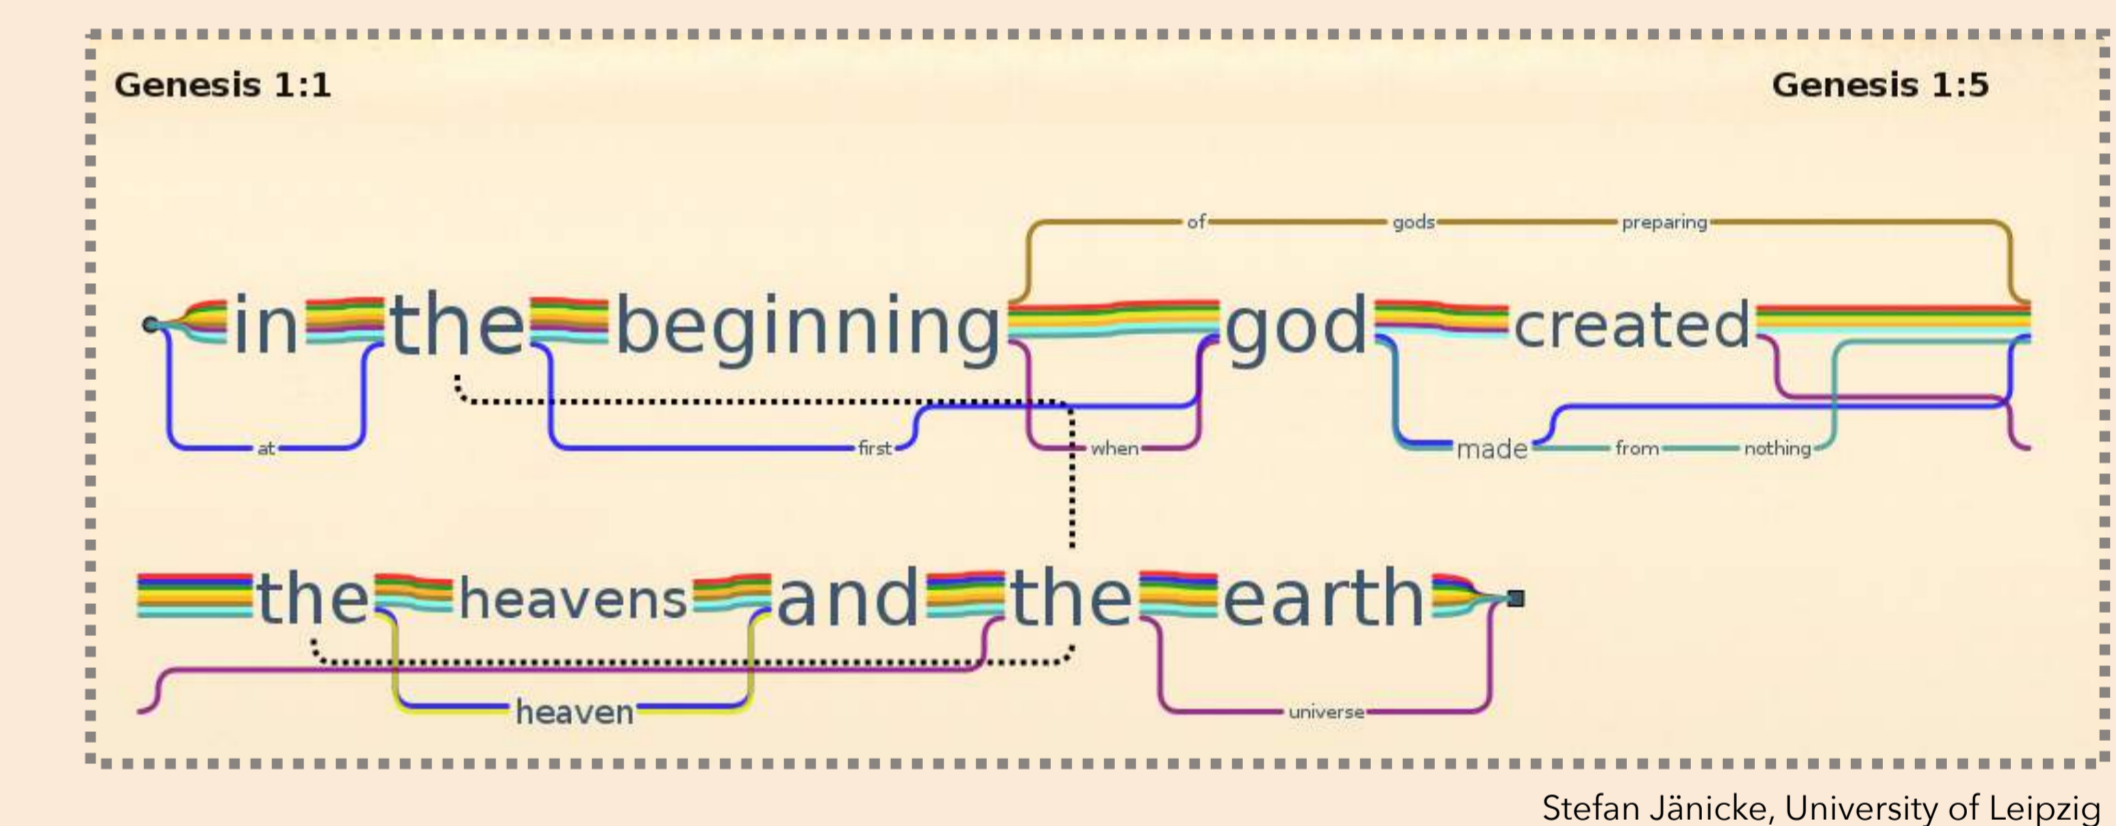

Proposed methodology: store text data in Canonical Text Services and links in RDF.

"IN THE
BEGINNING GOD
CREATED THE
HEAVENS AND THE
EARTH"
GENESIS, BOOK I

A(cceptance)

Information overload vs. information poverty. Packaging overload while retaining detail.

Proposed methodology: text graph variation visualisation (TRAViz) and URN notation (CTS/CITE Architecture).

Research Questions

When observing a sentence or word that has been used in multiple texts, one may ask:

- ▶ How to **organise** heterogeneous and **complex data**?
- ▶ What are the differences and similarities, and what do they tell us about the texts?
- ▶ How does one quantify and classify the similarities and the differences?

C(omplexity)

700,000 manually collected biblical references (*Bibindex*);

150 million words (*archive.org*);

40 million Ancient Greek and Latin words (*Open Philology Project*);

52 editions of English Bible translations (*mysword.info*).

Proposed methodology: Historical text re-use detection community building.

Research Questions

Can the study of text re-use...

- ▶ ...on high definition **images** of manuscripts enhance comparable research on **digital text**?
- ▶ ...tell us something about the accuracy and confidence of variation? Which authors quote the source more literally and why?
- ▶ ... show us that the variation noise tells us something about the source of the variation? What is the nature of the transmission contamination?
